Identification**

**21th - 23th May 2012
LEDNICE, Czech
Republic**

Not far from border line between Czech and Austrian lands, in Moravia, south from Brno, you can find the exceptionally designed landscape that evolved since the Enlightenment under the care of a Liechtenstein family. It contains a palace and the largest park in the country, which covers 200 km². Since 1996, this „garden of Europe“, has been registered together with the close town of Valtice in the Unesco World Heritage list and it attracts and amazes people all over the world.

On-line registration and
further information
available since
November 2011 at
